Overview:

HS 09 88

Assumptions:

Design Assumptions:

Please reference Scope Assumptions for system design assumptions

User Interface Assumptions

- 1. Functionality, user interface components and rendering, typography and visual design shall be based on BASE Exigen behavior.
- 2. Wireframes are presented in grey scale with the intention to modify the visual palette in a later sprint.
- 3. For string data type, and field masking we shall assume BASE Exigen data dimensions and behavior, unless otherwise specified in Data Dictionary.
- 4. The Information Architecture (IA) artifact is the definitive source for primary and secondary navigation tabs; Secondary Tabs; and the building blocks labels and order within a workspace.

[http://aaagateway/sites/IS\\_HO\\_Exigen\\_Project/System%20User%20Story/PAS\\_Property\\_IA\\_Artifact.pdf](http://aaagateway/sites/IS_HO_Exigen_Project/System%20User%20Story/PAS_Property_IA_Artifact.pdf)

- 5. This wireframe depicts all fields expanded. E.g., all conditional fields, and building blocks driven by booleans are displayed. The wireframes depict logically defaulted values with booleans for context.

Please reference business rules in the user stories for when these are triggered and default field values as specified in the data dictionary.

- 6. Mandatory and conditional mandatory fields are highlighted in yellow as per BASE Exigen behavior
- 7. UX team shall provide error message text for error scenarios in the Master Message List (MML); however, the actual placement of the errors shall not be shown.

Outstanding Issues:

None
